Comfortable light

- Light intensity dimmer

Easy positionable

- **Adjustable angle:** 20 degrees
- **Compact size:** 18x33 (DxW) cm

Satisfaction indicator

- 94% satisfied users
- **Best buy:** award by STIWA (2003) as successor of HF 3305

Medical appliance

- Proven health benefits

Product highlights

Original Philips EnergyLight lamps

The EnergyLight features original Philips EnergyLight lamps producing light with all the intensity and quality of natural daylight. In fact, it can give you up to 10,000 lux, but without any unpleasant dazzle or glare. If you use the EnergyLight for just 30 minutes a day (there's no need to stare into the lamp all the time) at a light intensity of 10,000 lux, you'll notice an improvement in your energy level and mood after just 5 days' use.

On product user protocol

Digital timer and display

The EnergyLight HF 3309 is equipped with a digital user interface with built-in user protocol for easy use, which amongst others also gives direct feedback on the amount of energy gained.

Light intensity dimmer

Get the energy as you do in summer while using the appliance at a convenient level of light you for example need for easy-reading. The EnergyLight HF 3309 features a light intensity dimmer so it can easily be adjusted between zero to about 10.00 lux (at 20 cm) matching the intensity of your personal preference.

Adjustable angle

The appliance can be positioned at various angles as appropriate.

UV-free

The EnergyLight uses the full natural daylight spectrum. It meets European safety standards and features an UV-filtering screen. The EnergyLight is therefore completely safe to use.

Best value for money

Successor of the HF 3305, which was awarded 'Best buy' in the German Stiftung Warentest 2003

Supported by the Medical Device Directive (MDD)

This device has proven health benefits, as certified by the Medical Device Directive (MDD).
