

Wireless Plus

MOBILE DEVICE STORAGE
Data Sheet

Seagate Wireless Plus, mobile storage you can access without wires or Web

With Seagate® Wireless Plus, you can enjoy your media and access your files without wires or the Internet. This mobile storage device broadcasts its own Wi-Fi network, so you can wirelessly stream your media and files to your tablet or smartphone on-the-go and off-the-grid. The free Seagate Media app for iOS and Android® makes it easy to navigate and enjoy content wherever you go.

Forget about having to choose which files to load onto your tablet or smartphone before a trip. Bring it all with you! Wireless Plus has 1TB of built-in storage, which means you can load up to 500 movies or thousands of songs, photos and documents¹. Simply drag-and-drop to load files wirelessly from your PC or Mac® computer or use the USB 3.0 adapter to load files up to 10x faster than Wi-Fi N.

Wireless Plus allows up to eight tablets and smartphones to access and store content at the same time. Leave it in your bag, set it on the table, place it anywhere in the car—with a range of up to 150ft you'll never feel tethered to your storage. Best of all, by creating its own Wi-Fi network, there is no need for an Internet connection and you don't have to use your data plan.

¹ Quantitative usage examples for various applications are for illustrative purposes. Actual quantities will vary based on factors, including file size, file format, features and application software.

Wireless Plus

MOBILE DEVICE STORAGE

Navigating your media library is a snap with the Seagate Media app for iOS®, Kindle Fire and Android®. Sort through large media libraries with filters, keyword search, and folder and thumbnail views. Download movies and other media to your device, so you can enjoy your content later, when not connected to Wireless Plus. When you need more storage capacity on your smartphone or tablet, you can easily off-load photos and videos from your device's camera roll by uploading them to your Wireless Plus storage device using the Seagate Media app.

At home, Wireless Plus can stream media to your TV too. Game consoles, smart TVs, connected Blu-ray players and other DLNA devices can access the content on Wireless Plus whenever you have it connected to your home network via Wi-Fi. If you have an Apple TV®, your iPad, iPhone and iPod touch can use Airplay® to take your media from small screen to big screen. Additionally, with Samsung Smart TVs and Blu-ray players, you can install the Seagate Media app directly on your Samsung device and experience the content with an interface optimized for living room viewing with easy remote-control navigation.
