

Logitech®

Mobile Pro™ Headset

Communicate clearly anywhere

- 10 hours talk time
- Noise-cancelling microphone
- Professional audio quality
- For native Bluetooth® mobile phones and PCs

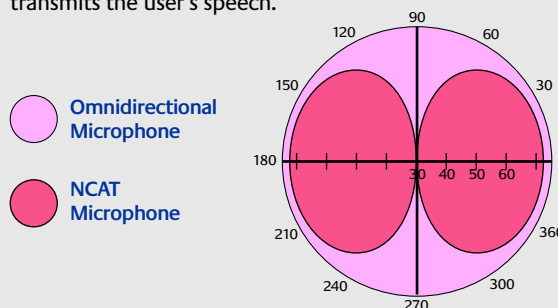

Mobile Pro Headset is designed for business users who want the best hands-free experience with their mobile phone. An impressive 10 hours talk time. The headset has an innovative clip, so it can be put on quickly, meaning you won't miss important calls. It's also comfortable for long conversations or car journeys. It uses Bluetooth 1.2, a newer version than most cordless headsets, which provides faster connection time between your phone and the headset. The noise cancelling microphone removes background interference, even if you are in noisy places like airports or in the car, so that the person you are speaking with will hear you clearly.

Talk time	Standby time	Super light	Noise Cancelling	Bilateral	Clip

Noise Cancelling and Amplification Technology NCAT™

Ordinary, omni directional microphones hear well from all angles, picking up random sounds as well as speech. Microphones with NCAT pick up virtually none of the sounds emanating from the sides of the microphone, resulting in a low-noise microphone that crisply transmits the user's speech.

Product specifications
