

The NETGEAR ProSafe 10 Gigabit Stackable Managed Switch, XSM7224S, allows for a flexible top-of-rack infrastructure. All 24 ports of 10 Gigabit SFP+ interfaces are Gigabit/10 Gigabit capable and deliver wired speed performance with ultra low latency. Four shared 10GBase-T interfaces broaden 10 Gigabit connectivity with auto-sensing RJ45. Local/distant stacking provides versatile 10 Gigabit deployment possibilities, such as Distributed (LACP) Aggregation for virtualized servers and storage.

### Enterprise-class L2+

Combining superior resiliency, enterprise-class security, and non-blocking performance, the XSM7224S offers a full set of Layer 2 management features, as well as Layer 2+ (Layer 3 lite) with unsurpassed affordability. Together with VLAN routing, voice-class prioritization, and chassis-like stacking, the XSM7224S can be deployed as a data center top-of-rack switch, or closer to the core of small and medium businesses' growing networks, as a distribution layer 10 Gigabit Ethernet aggregation switch.

### L3 Scalability

The Layer 3 upgrade license XSM7224L unlocks the IPv4/IPv6 dynamic routing capabilities of the XSM7224S. Purposely built for enterprise networks and core/aggregation layers of SMB networks, an L3 upgraded XSM7224S provides advanced routing protocols such as OSPF, VRRP, and multicast for converged applications.

### Data Center Availability

The NETGEAR 10 Gigabit Stackable Managed Switch, XSM7224S comes with a removable power module for the main power supply with a second internal redundant power supply available as an option. Two removable fan trays increase the availability of the system, providing front-to-back cooling airflow for best compatibility with data center hot aisle/cold aisle airflow patterns. Like all NETGEAR ProSafe Managed Switches, the XSM7224S is backed by the NETGEAR ProSafe Lifetime Warranty.

- 24 SFP+ 10 Gigabit ports **1**
- 4 Combo 10GBaseT RJ45 ports **2**

Extra bay for optional redundant power supply  
Spare part: APS300W

**Sold Separately**

Two Removable Fan Trays  
2 Fans per Tray  
Spare part (each tray): AFT200

**Included**

Replaceable modular main power supply

**Included**

#### Layer 3 upgrade license, see details on page 13:

- Ordering part number: XSM7224L-10000S
- RIP, OSPF, VRRP
- Multicast routing

## Target Applications

### Top-of-Rack Access Layer for Servers

With virtualization, servers and network storage devices need high-performance connectivity, low latency and network redundancy. The XSM7224S simplifies and lowers the cost of typical top-of-rack architecture. In this configuration, two stacked switches per rack connect up to 21 servers/storage units in a server-to-switch distributed redundant trunking mode. The hardware-stacking dual-ring topology provides one unique CLI/GUI platform, simple management, network and servers/storage perfect resiliency, as well as intelligent load balancing. All servers can set up their NIC with active-active teaming across the stack, allowing distributed LACP for better performance.

### Core/Aggregation for Mid-sized Networks

XSM7224S offers enterprise-class aggregation layer for medium-sized enterprise networks and even core capability for two-tiered typical SMB networks. 1000BT/SX/LX are supported by each SFP+ port for more flexibility with non 10 Gigabit legacy equipments. With the Layer 3 license upgrade, the XSM7224S is optimized for Layer 2/Layer 3 core switching. In this configuration, 4 stacked XSM7224S switches authorize high performance distributed trunks and management is simplified. Each stack acts as a single routing switch, with only one GUI/CLI and multiple distributed link aggregations. Spanning Tree is no longer required for network resiliency. Distributed Link Aggregation (LACP) provides intelligent load balancing across the network – from the edge to the core.

# NETGEAR Hardware Stacking

## Local and Distant Stack Topology

### Local Stack Topology

When switches are deployed in the same rack they can use either:

- SFP+ Direct Attach cables and SFP+ ports
- CAT6A RJ45 cables and combo 10GBaseT ports

Four ports per switch are preferred for stacking and all 24 ports are stack-capable.

Each ring speed is 20 Gbps half duplex (40 Gbps full duplex).

Dual ring overall speed is 40 Gbps half duplex (80 Gbps full duplex).

### AXC761 1 m Direct Attach SFP+ Cable

- Two cables per switch in the stack

### Or Cat6A RJ45 patch cables

- Two cables per switch in the stack
- For use with built-in 10GbaseT ports

### Distant Stack Topology

When switches are deployed in several locations, SFP+ optics (AXM761 or AXM762 or AXM763) and fiber are used for this hardware dual-ring topology, providing highest resiliency and intelligent load balancing.

Each ring speed is 20 Gbps half duplex (40 Gbps full duplex).

Dual ring overall speed is 40 Gbps half duplex (80 Gbps full duplex).

Local and Distant Stack can be combined for maximum flexibility, using Direct Attach SFP+ or CAT6A copper cables and AXM761/AXM762/AXM763 SFP+ optics.

### AXM761 or AXM762 or AXM763 SFP+ 10GBase-SR or LR or LRM optics

- Four SFP+ modules per switch are recommended for full 80 Gbps bandwidth and complete redundancy

## NETGEAR Hardware Stacking

| Features  | Benefits   |
|---|--|
| Single IP address management  | <ul style="list-style-type: none"> <li>Stack up to 4 switches as a single "chassis" logical unit</li> <li>One GUI and one CLI managing the whole stack</li> <li>The stack acts as a single switch in the network</li> <li>The other switches in the network also see the stack as a single switch</li> <li>Growth is easy, adding a switch to the stack is as simple as connecting the new unit to the stack (configuration is instantly updated)</li> </ul>                       |
| Bi-directional architecture<br>4 ports per switch<br>80 Gigabit local stacking capacity<br>80 Gigabit distant stacking capacity | <ul style="list-style-type: none"> <li>Higher stacking throughput capacity with lower latency and jitter for VoIP and video traffic</li> <li>Each switch in the stack understands the shortest path to forward traffic, bi-directionally both up and down</li> <li>Vertical/local stacking and horizontal/distant stacking can be mixed for convenient 10 Gigabit deployments (core, distribution layer, top-of-rack)</li> </ul>   |
| Stack fast resiliency<br>Automatic unit replacement (AUR)   | <ul style="list-style-type: none"> <li>Dual-ring architecture ensures that if a switch fails within the stack all the other switches can still communicate with one another</li> <li>If the stack master fails, the secondary stack master takes over in less than 2 seconds for minimum packet loss</li> <li>Adding a new switch to the stack or replacing a failed unit requires no service interruption, the configuration file is automatically pushed by the stack</li> </ul> |
| Distributed LACP across the stack   | <ul style="list-style-type: none"> <li>Increased performance with distributed trunks</li> <li>Greater redundancy as several switches within the trunk (up to 8 ports per trunk – 64 trunks are allowed)</li> <li>Server-to-switch distributed redundant trunking across the stack for active-active server teaming connections</li> </ul>  |
| Many-to-one port mirroring across the stack   | <ul style="list-style-type: none"> <li>More flexibility for device troubleshooting</li> <li>As for a chassis, port mirroring is available from every port to every port across the stack</li> </ul>  |
| VLANs automatic propagation across the stack  | <ul style="list-style-type: none"> <li>As for a chassis, VLAN port tagging or private groups are available everywhere across the stack as for a single switch (unit 1, port 2; unit 2, port 3, etc.)</li> <li>No configuration required for the VLAN propagation between the switches</li> </ul>   |

## Associated Modules and Optics

### SFPs (optics)

#### AXM761 ProSafe 10GBase-SR SFP+ LC GBIC

- 10 Gigabit Ethernet “short-reach” fiber connectivity
- LC duplex connector
- Fits into any 10 GE SFP+ interface (front)
- Drives 10 Gigabit Ethernet up to 300 m distances with 50/125 $\mu$ m laser-optimized OM3 multimode fiber cables
- Drives 10 Gigabit Ethernet up to 33 m distances with 62.5/125 $\mu$ m OM1 multimode fiber cables
- 5-year Warranty
- Ordering part number: AXM761-10000S

#### AXM762 ProSafe 10GBase-LR SFP+ LC GBIC

- 10 Gigabit Ethernet “long-reach” fiber connectivity
- LC duplex connector
- Fits into any 10 GE SFP+ interface (front)
- Drives 10 Gigabit Ethernet up to 10 km distances with 9/125 $\mu$ m SMF single mode fiber cables
- 5-year Warranty
- Ordering part number: AXM762-10000S

#### AXM763 ProSafe 10GBase-LRM SFP+ LC GBIC

- 10 Gigabit Ethernet LRM “long reach multimode” fiber connectivity (802.3aq standard)
- LC duplex connector
- Fits into any 10 GE SFP+ interface (front)
- Drives 10 Gigabit Ethernet up to 220 m distances with legacy 62.5/125 $\mu$ m OM1 multimode fiber cables
- Drives 10 Gigabit Ethernet up to 260 m distances with 50/125 $\mu$ m laser-optimized OM3 multimode fiber cables
- 5-year warranty
- Ordering part number: AXM763-10000S

#### AGM731F ProSafe 1000Base-SX SFP LC GBIC

- Gigabit Ethernet “short-reach” fiber connectivity
- LC duplex connector
- Fits into any 10 GE SFP+ interface (front)
- Drives Gigabit Ethernet up to 550 m distances with 50/125 $\mu$ m laser-optimized OM3 multimode fiber cables
- Drives Gigabit Ethernet up to 275 m distances with 62.5/125 $\mu$ m OM1 multimode fiber cables
- 5-year Warranty
- Ordering part number: AGM731F

#### AGM732F ProSafe 1000Base-LX SFP LC GBIC

- Gigabit Ethernet “long-reach” fiber connectivity
- LC duplex connector
- Fits into any 10 GE SFP+ interface (front)
- Drives Gigabit Ethernet up to 10 km distances with 9/125 $\mu$ m SMF single mode fiber cables
- Drives Gigabit Ethernet up to 550 m distances with 62.5/125 $\mu$ m OM1 or 50/125 $\mu$ m OM3 multimode fiber cables
- 5-year Warranty
- Ordering part number: AGM732F

## Associated Modules and Optics

### AGM734 ProSafe 1000Base-T SFP RJ45 GBIC

- Gigabit Ethernet RJ45 copper connectivity
- RJ45 connector
- Fits into any 10 GE SFP+ interface (front)
- Drives Gigabit Ethernet up to 100 m distances with CAT5E / CAT6 or better cables
- Supports only 1000BaseT mode, no 10BaseT/100BaseT auto-sensing
- 5-year Warranty
- Ordering part number: AGM734-10000S

### AXC753 ProSafe 3m Direct Attach SFP+ to XFP

### 3m SFP+ to XFP Direct Attach Cable

- Direct Attach copper cable (10GSFP+Cu)
- SFP+ connector on one side
- XFP connector on the other side
- Fits into any 10 GE SFP+ interface (front)
- XFP connector fits into any 10 GE XFP interface such as XCM8808X (Chassis Switch)
- Drives 10 Gigabit Ethernet (3 m distance)
- 5-year Warranty
- Ordering part number: AXC753-10000S

### AXC761 ProSafe 1m Direct Attach SFP+ Cable

### 1m SFP+ Direct Attach Cable

- Direct Attach SFP+ copper cable (10GSFP+Cu)
- SFP+ connector on both sides
- Fits into any 10 GE SFP+ interface (front)
- Drives 10 Gigabit Ethernet (1 m distance)
- 5-year Warranty
- Ordering part number: AXC761-10000S

### AXC763 ProSafe 3m Direct Attach SFP+ Cable

### 3m SFP+ Direct Attach Cable

- Direct Attach SFP+ copper cable (10GSFP+Cu)
- SFP+ connector on both sides
- Fits into any 10 GE SFP+ interface (front)
- Drives 10 Gigabit Ethernet (3 m distance)
- 5-year Warranty
- Ordering part number: AXC763-10000S

### APS300W ProSafe Auxiliary Power Supply

### Optional Redundant Power Supply

- Provides a second redundant power supply
- Fits into the second power supply bay
- Hot-swappable
- 5-year Warranty
- Ordering part number: APS300W-10000S

### AFT200 ProSafe Auxiliary Fan Tray

### Spare Modular Fan Tray

- Provides a replaceable fan tray
- AFT200 contains only one fan tray with two fans
- Two fan trays are required for the switch
- 5-year Warranty
- Ordering part number: AFT200-10000S
