

BallistixTM Active Cooling Fan

To get more out of your performance memory, play it cool.

Anyone looking to reduce system temperatures and increase airflow will benefit from the Ballistix active cooling fan. This solution provides additional cooling for Ballistix performance memory by eliminating “dead spots” of airflow within a system’s memory area. It features two 60mm clear fans running at 3000 RPM with 3-pin or 4-pin power connection options, along with height adjustable sides for installation over standard height or taller finned memory modules. The Ballistix active cooling fan is also ideal for water-cooled systems where internal airflow around memory is minimal.

Flexible and quiet, it’s the perfect complement to your Ballistix DDR2 or DDR3 memory. It’s stylish too, enhancing your internal case design; when combined with your Ballistix Tracer modules, your system will dazzle.

Easy to install and connect, the Ballistix active cooling fan is a great product to pair with your performance memory.

Crucial. The Memory Experts.SM

BENEFITS:

- Active cooling for your Ballistix memory
- Increase airflow to your system memory
- Reduce memory temperatures with proper airflow
- Easy to attach (flex attachment to memory sockets with no tools required)
- Low noise level
- Complementary color scheme (black/silver)
- Clear fans allow you to still see your Ballistix Tracer lights (sold separately)
- Limited 1 year warranty

	Product	BLACTIVECOOL
Specifications	Dimensions	155 mm x 77.6 mm x 71.6 mm
	Weight	200 g
	Fan	2 x 60 mm
	Air Flow	15 CFM
	Noise Level	25 dBA (28 max.)
	Bearing Type	Sleeve
	Power	12V DC 3 pin Power Connector 4 pin Adapter Included
	Certifications	WEEE, RoHS
