

## Cheetah 15K.5

Mainstream enterprise disc drive storage

The Best  
Price/Performance,  
Lowest Cost of  
Ownership Disc Drive

**300, 146 and 73GB—15K RPM—Ultra320 SCSI, 3 Gbit/sec Serial Attached SCSI (SAS) and 4 Gbit/sec FC**

### Key Advantages

- Perpendicular recording is fundamentally superior, enabling 300GB capacity with 30 percent higher performance.
- Cheetah 15K.5® is the first drive to break the 100-Mbyte sustained transfer rate barrier, delivering up to 125 Mbyte/sec.
- Fastest and most reliable Cheetah 15K ever
- 30 percent more IOPS and more than 20 percent faster response times than 3.5-inch 10K drives
- Enables higher performance with fewer drives, reducing supporting infrastructure, maintenance and space needs, while increasing system reliability
- Highest reliability of any 3.5-inch drive in the industry, designed for demanding 24x7 enterprise applications
- Reduces RAID rebuild times while minimizing reliability risks
- Nonrecoverable Error Rate has been improved by a factor of 10.

### Best-Fit Applications

All mainstream enterprise applications, such as:

- E-mail
- Business processing
- Transaction processing
- Decision support
- Storage Area Networks (SAN)
- Networked Attached Storage (NAS)
- Internet and e-commerce

# Cheetah 15K.5

## Mainstream enterprise disc drive storage

### Lowest Cost of Ownership

- Fifth-generation Cheetah 15K is the fastest, highest capacity and most reliable ever.
- Cheetah 15K performance and reliability enable lower TCO for a wide variety of enterprise applications.
- Cheetah 15K RPM and fast seek times deliver the fastest time-to-data, resulting in 30% more IOPS and >20% faster response times than 3.5-inch 10K drives.
- Cheetah 15K enables higher performance with fewer drives—reducing support infrastructure, physical space requirements and storage management costs.
- Cheetah 15K drives have the highest reliability of any 3.5-inch drive in the industry, and further increase system reliability due to the need for fewer drives.

### Highest Reliability

- Optimal reliability and data protection continues to be a focus of Seagate enterprise drives. Adding several new features in this generation of Cheetah 15K has improved the nonrecoverable error rate by a factor of 10.
- Seagate-exclusive IRAW (Idle Read After Write) enhances data protection by verifying—during drive idle time—that data in the drive buffer was properly written.
- Seagate-exclusive enhanced Error Correction Code better maintains performance throughout the life of the drive and reduces the probability of lost data.
- The second generation of Seagate-exclusive Background Media Scan (BMS) proactively scans the media for potential defects during drive idle time. It enables incipient errors to be corrected before data is lost.
- The Cheetah 15K.5 is designed and manufactured by the same teams that successfully delivered the past four award-winning generations of Cheetah 15K.

### World-Class Technical Support

- Certified, experienced support staff
- Rated “Above Average to Excellent” by 95% of our customers
- Support lines with the shortest wait times in the industry
- Individually archived case histories for quick reference
- Web-based Q&A forum and autoreply e-mail
- Seagate Design Service Centers (DSC) help companies transform innovative ideas into viable products.
